TRAINING/CERTIFICATION

Full Stack Development using React Js and Python with Django
Durshikshya Education Network / 2022

I studied a full stack course in which I learned from the basics of HTML/CSS and JavaScript to the front-end design using React JS and back-end development using Python with Django framework.

PROJECTS

Frontend Forest Website Design

Made a complete copy of this website
(_Forest Design_) using nothing but HTML and CSS. I learned a lot about Front-end designing and making responsive good user experience websites.
Github:

https://github.com/Shubhamg111/frontend_design-forest

Tourism Website

Implemented a basic CRUD operation, admin page, userpage with register and login function using Django framework. I learned a lot about the working mechanisms of the backend of any website.
Github:

https://github.com/Shubhamg111/Tourism_Website

E commerce Website

Made a working eCommerce website using Django framework, HTML5, CSS and Bootstrap, in which users can browse products and add it to cart. It implements the API of Esewa as a payment gateway and whatsapp integration for communication.
